About Elevance Renewable Sciences, Inc.

Headquartered in Woodridge, Ill., Elevance Renewable Sciences, Inc. creates novel, high-performing specialty chemicals from renewable feedstocks using a proprietary Nobel Prize-winning olefin metathesis technology. These chemical building blocks are leveraged in a wide range of applications, including detergents, coatings, personal care, oil field, agricultural chemicals and engineered polymers. Elevance uses a collaborative business model, exploring opportunities to engage with industry leaders, accelerating time to market and leveraging market expertise while enabling its partners to achieve growth through sustainable and higher performing solutions.
